Tourne Campervan

The Tourne Challenge

Tourne is an exciting, intelligent, custom-fitted campervan that changes the way we think about mobility, travel, touring, camping and more. The entire Tourne experience is designed to liberate and inspire, to take you places in comfort, confidence and your own individual style – anywhere.

AGILE AND DURABLE

Go Anywhere Safely, Easily, Legally

At first glance Tourne looks much like an ordinary van – from the outside, anyway.

That's because it is; and that's the beauty of it, what makes it so practical.

Because you can take Tourne most anywhere you can take a regular car. Many camper vehicles simply can't go anywhere you like – nor would you want to try, even if you could. So Tourne is as much at home (and legal) in busy urban centres as it is well off the beaten track. Forget tight, awkward turns, frantic downshifting, labouring unnecessarily slowly along otherwise lovely winding roads. Embrace the long and winding road, go where you want when you want. That's the real Tourne advantage.

Not only can you take it most anywhere, you can also park it just about anywhere. Sneak it in anywhere you'd park a car, quickly and easily. And Tourne's footprint – physically and visually both – is so modest it won't get in the way of any(one's) striking views.

ALL SEASONS VAN

Stay Warm, Stay Mobile

Tourne's integrated system heating combined with insulated cabin ensures you'll stay warm and comfortable, whatever the weather.

Similarly, what you don't see, or even sense, is important, too. Because while you're warm and comfy inside, the critical accessories and features, too, are treated equally well: the water reservoir, waste reservoir and related plumbing are all insulated and heated, so nothing freezes and everyone's happy. (If temps drop below -10°C it's probably time to head for warmer climes.) The WC / shower is all function and convenience, and the second sink always comes in handy, too.

And insulated water and waste tanks underneath the vehicle, together with an integrated heating system ensures nothing will freeze up – which frees you up to enjoy, even at sub-zero temperatures.

DREAM4SYSTEM

Sleep Well, Sleep Many

Tourne's Dream4 is a unique, patented design scheme that allows a standard van to sleep up to four people – inside the vehicle proper. In just a few, very easy steps that anyone can do in mere minutes, the dining area can be reconfigured into a second double bed.

No other vehicle on the market boasts a design so intuitively smart and marvellously practical. Chairs aren't beds, they're made for sitting. Get a good night's sleep on a proper, giving yet firm mattress. Sleeping shouldn't be an adventure, it should be restful, an enjoyable end to a great day – and help recharge you for the next exciting day on the road.

Under the bed is an expansive storage area designed to accommodate clothing, equipment and accessories, each in its own dedicated place.

FULLY INTEGRATED KITCHEN

What's Cooking?

The Tourne kitchen is an intelligent, compact and practical full-time working kitchen. It features a proper dual-burner gas stove, a fridge, and a stainless steel sink – all of which can be covered up with a smart, fold-down acrylic work-counter top. So you can prepare and cook or simply heat real meals, wherever and whenever. Cupboards up top and below are robust, good-looking and practical, and all feature easy locks and securing mechanisms that ensure things stay in their proper place.

UP CLOSE

Small features, big benefits

Windows & Skylights

Insulated, double-glazed windows stay cool and quiet, while screened and shaded skylights brighten things up.

Lights & Connections

Bright LED lights and USB connections where and when you need them.

Bathroom

WC/shower is all function and convenience, and a second sink always comes in handy.

Bathroom, Hanger rods

Unused bathroom doubles as a cupboard for hanging and drying clothes discretely and effectively.

Big Little Fridge

Features an exceptionally large compact fridge for more convenience and enjoyment.

Awning

Custom roll-out retractable awning offers shelter from the elements – easy up/easy down.

Storage

Intelligent design means more storage room mid- and rear-cabin, under beds, counters and more.

Insect Screen

Keeps interior bright, fresh and well-ventilated – without any unwanted little visitors.

UP CLOSE

Getting Technical

Versatile Multifunctionals

Slide-out cupboard/drawers facilitate storage, mid-cabin beds, or make a handy seat.

Breathing Cupboard Doors

Cupboard doors are fit to allow for air circulation inside and provide for handy, easy-open access.

Materials & Build Quality

All structural furnishings are made from precisely-fitted quality processed wood.

Insulation

Cabin is wrapped in quality Armaflex insulation for warm winters and easy summers.

Armaflex®

Insulated Water Reservoir

Insulated water and waste tanks ensures nothing will freeze up – even at sub-zero temperatures.

Integrated Floor Heating

Integrated floor heating system ensures everyone stays warm and comfortable.

EBECO 

Webasto air heating

Quality Webasto diesel heater for warm, comfortable air temperatures, whenever.

Webasto

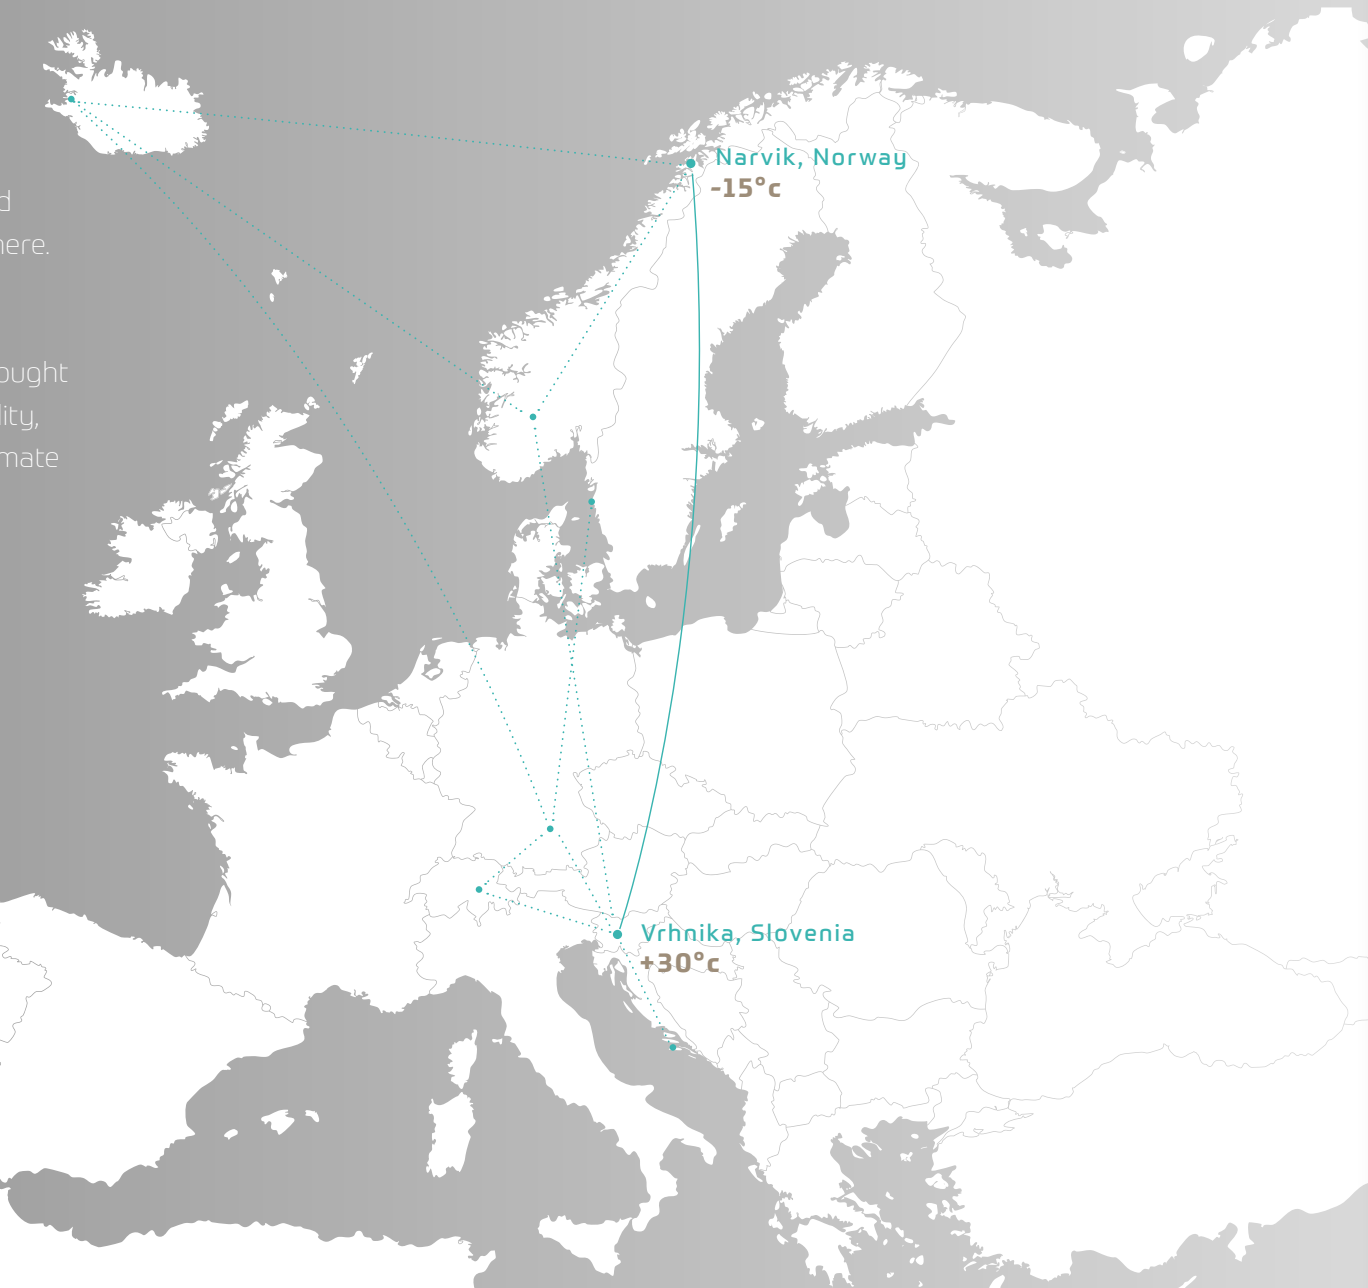

Water heater

Combines propane and electric sources to heat water quickly, quietly and efficiently.

Whale
WATER SYSTEMS SPECIALIST

Tourne truly is a campervan designed for use throughout the year – anywhere. From the beginning it was developed in close collaboration with our well-experienced Nordic partners, who brought a particular functional design sensibility, smart technology and demanding climate considerations to the table.

The Tourne story

TOURNE ORIGINS

Everything Tourne is hand-assembled in the heart of Europe, in central Slovenia, a country known for its richly diverse regions, tastes and terrains, and nestled between Italy, Austria, Hungary and Croatia.

Tourne is a telling metaphor for the country in which it's produced: it's comparatively small, and it's smart, flexible, well-designed and well-rounded. And the country's very special beauty, which runs from southern, seaside soft to mountainous rough and rugged, means it's well travelled by locals and visitors alike. It also means we know camping, motoring, and the value of experiencing the elements as they are, in all their authentic, natural beauty.

TOURNE TREATMENT

All of the structural furnishings – beds, tables, cupboards and cabinetry, countertops and more – are made from quality processed wood, and all precisely produced locally by a renowned, state-of-the-art carpentry and furnishings contractor and (quiet) supplier to some of Europe's most prestigious design brands.

Lines, colours, surfaces and finishes are smart, tasteful and easily maintained. LED lighting is bright, efficient and effective – easily accessed and where you need it. Things work and are located how and where you'd expect them to – along with a few nice surprises along the way.

TOURNE DESIGN

A taste of Scandinavian design – tasteful elegance, simple functionality – meets Central European strength and durability, with a hint of southern passion and charm; and all inspired by a love of the open road, adventure and new horizons.

Combining mobility, comfort and functionality in a confined space is a big challenge. That's why Tourne's head of design brought years of experience with sailboats and sailing technology to the Tourne project. Instead of simply re-fitting or re-working existing configurations we approached the entire mobile experience from the very beginning and incorporated intelligent solutions every step of the way.

It's been said many times, it's not about the destination, but about the journey. Yet we're equally big on destinations, we like going and being places. And because, in the end, why choose, when you can have it both ways – indeed, have it all?
